

QObject

```
classDiagram
    class QObject
    class InfinityDouble {
        +InfinityDouble()
        +FromValue()
        +InfinityValue()
    }
    QObject <|-- InfinityDouble
```

The diagram shows a class hierarchy. At the top is a box for 'QObject' with two empty compartments. Below it is a box for 'InfinityDouble' with three compartments. The top compartment of 'InfinityDouble' contains the class name. The bottom compartment contains three public methods: '+ InfinityDouble()', '+ FromValue()', and '+ InfinityValue()'. A blue arrow with an open triangle head points from the top of the 'InfinityDouble' box to the bottom of the 'QObject' box, indicating inheritance.

InfinityDouble

+ InfinityDouble()  
+ FromValue()  
+ InfinityValue()
